

Superior Clamping and Gripping

Product Information

Plastic inserts QUENTES

QUENTES

Plastic inserts

Process-reliable. Stable. Gentle.

Plastic inserts Quentes

for gentle clamping of sensitive workpieces and increase of the static friction.

Field of application

variable clamping tasks, for sensitive workpieces

Advantages – Your benefits

High coefficient of friction appr. 0.3 – 0.4 by using a glass fiber reinforced plastic

Gentle clamping of very fine surfaces, no formation of clamping marks, excellently suitable for ground or surface-treated components

Cost-effective system

High stability due to the aluminum supporting structure of the supporting jaw

Complete workpiece contact for deformation-free clamping of machined components.

Options and special information

Material: Clamping inserts of glass fiber reinforced plastic

Application example

① QUINTES fiberglass jaws

② PGN-plus 2-finger parallel gripper

③ Rotary Actuator SRU-plus

SCHUNK offers more ...

The following components make the product QUINTES even more productive – the suitable addition for the highest functionality, flexibility, reliability, and controlled production.

Jaw blanks

PGN-plus 2-finger parallel gripper

PZN-plus 3-finger centric gripper
