TENDO® E compact
The Hydraulic Expansion Toolholder
Secure your price advantage by ordering a starter kit at £299.00 now
Tighter tolerances, huge cost pressure, better quality – TENDO E compact is the answer to increasing demands in volume cutting – demands which can no longer be met economically using ER collets, heat shrink toolholders, Weldon toolholders and cheap hydraulic expansion toolholders.

The TENDO E compact boasts a price which makes it easier to change from mechanical and thermal toolholders to significantly higher-precision TENDO quality.

- Maximum clamping torque now up to 900 Nm with Ø 20 mm under dry clamping conditions, 520 Nm with oily tool shanks
- Permanent run-out and repeat accuracy of less than 0.003 mm
- For universal use in milling, boring, reaming and thread-cutting
- Increases service life of tools by up to 40% leading to cost savings
- Tool changes in seconds with no peripheral equipment – clamping to a dead stop

The universal hydraulic expansion toolholder for volume cutting, boring, reaming and thread-cutting.

Secure your price advantage!

The TENDO E compact starter kit contains:
- 1 x TENDO E compact (either HSK-A63 Ø20, SK40 Ø20 or BT40 Ø20)
- 5 x GZB-S Ø 20 (with clamping Ø 6, Ø 8, Ø 10, Ø 12, Ø 16) coolant proof up to max. 80 bar
- 1 x sleeve remover
- 1 x actuating key
- 1 x exclusive packaging

TENDO E compact
The toolholder for almost every requirement

TENDO E compact is setting completely new standards. A strong performance during torque transmission, damping characteristics, rigidity and run-out accuracy, the TENDO E compact is perfect for precise and fast metal cutting – even for roughing applications.

1 Volume machining
   TENDO E compact is the first hydraulic expansion toolholder, which is suitable for volume machining e.g. 400 cm³/min (25 in³/min) with 42CrMo4 (4140)*.
   *depending on the machine tool and the cutting tool

2 Reaming
   During reaming the excellent vibration damping assures best workpiece surfaces and a permanent run-out accuracy for an excellent dimensional accuracy.

3 Drilling
   Drilling – the classic strength of the TENDO-family. Vibration damping and a run-out accuracy of less than 0.003 mm are the main strengths of the TENDO E compact.

4 Countersinking/Chamfering
   By using TENDO E compact countersinking and chamfering are defined by precision and excellent run-out accuracy.

5 Tapping
   At high torques (of up to 900 Nm at Ø 20 mm) and excellent vibration damping, the TENDO E compact was made for tapping.
